- Three Serial Ports and One USB Port for Memory or Scanner
- Supports Semi-Integrated Electronic Payment for Credit, Debit and Gift Card Transactions

Choose the Model That Best Fits Your Store

SAM4s NR-510 is Great For Food Service

Applications

Cafeterias, Quick Service, Concessions, Ice Cream / Frozen Yogurt Stands, Hamburger, Sandwich, Pizza, Coffee, Bakery, Deli's, Bars

The flat, **spill-resistant** keyboard is perfect for harsh food service environments. Using the programmable key locations for preset PLUs will facilitate fast and accurate registration. The NR-510 supports two price levels. Modifiers can be used where menus change during the day and the key-sheet under the overlay is easily exchanged.

SAM4s NR-510R is Great For Retail Merchants

Applications

Retail, Gift Shops, Convenience Stores, Beer/Wine/ Liquor, Specialty Food, Produce, Meat, Main Street Merchants

The traditional raised-key keyboard provides 12 keyboard PLU keys. Keyboard PLUs act like traditional departments for open-priced entries or can be set as preset price keys. Large key size ensures easy-to-read key labels. Merchants who wish to scan can build their PLU file on the fly using the not-found PLU registration feature.

Popular Components Included

An extremely cost-effective and environmentally friendly bundle – each NR-510 and NR-510R register includes a high-speed thermal printer, multi-line operator screen, rear customer display, system control keylock and a high quality cash drawer.

Thermal Receipt Printer

The high-speed thermal receipt printer is programmable to select receipt or journal printing up to 32 characters per line on 58mm (2¼") paper.

Operator Display

The easy-to-read, blue backlit, 192 x 64 graphic LCD operator screen identifies each item as it is entered.

Rear Display

The blue backlit, two-line by 16-character LCD customer display allows customers to monitor prices as items are entered and view the sale total.

Quality Cash Drawer

Features a steel construction, 5 bill, 5 or 6 coin removable insert with adjustable coin dividers, two media slots and a standard security lock and key.

Thermal Printer

The NR-510 and NR-510R are programmable to select receipt or journal printing up to 32 characters per line on 58mm (2¼") paper. Prints up to a 6-line preamble and 6-line postamble receipt message. Optionally, a user defined graphic logo, coupon or advertising message can be programmed and printed.

Electronic Journal

While single printer models are typically best for receipt-only or journal-only applications, if a sales journal is needed, the journal can be archived electronically for printing at end-of-day, and can be polled and collected by a PC using the included eSpesso utility. A variety of electronic journal reports are available that allow you to quickly audit selected activities.

Security and Management Control

Transaction voids, reporting and programming functions are restricted by manager's key lock control. Programmable options let you enforce the appropriate level of security for your business. Among many options, you can control coupons, discounts, voids, refunds, cancels and negative sales. Plus, the NR-510 and NR-510R provide strict cash control with enforced closed drawer and an open drawer alarm.

Ensure Speed, Security and Efficiency

- The NR-510 Series is electronic payment and gift card processing ready.
- EMV transactions can be processed quickly using the latest Datacap IPTran-LT™ or PDC/TranServer™ technology along with an appropriate PIN pad and a persistent internet connection.
- Semi-integrated processing is secure as no credit card information is stored in the ECR.
- Semi-integrated processing streamlines end of day reconciliation and eliminates dual entry keying errors.

POS Connections and Options

The affordable SAM4s NR-510 and NR-510R supports popular systems and off-the-shelf POS peripherals. Three Standard Serial communication ports are standard and one USB port are available for popular peripheral and system options: • Direct or Modem PC Communications with Optional Polling Software • Kitchen Printer • Slip Printer • Scale • Scanner • Pole Display • Kitchen Video • Video Surveillance • Semi-Integrated Electronic Payment Processing

Connector Panel

A combination of three serial ports and one USB port are available to support popular off-the-shelf POS peripherals.

Bar Code Scanning

Enjoy the advantages of scanning – speed of service, price control, item movement reporting and labor savings.

eSpesso Utility

Use the SAM4s eSpesso for Windows Utility to save, load and edit programs locally and to capture and edit reports.

Remote Printing

Enjoy crisp high quality requisitions and orders from a high speed thermal POS printer.
